

CHARLES CAHILIG

Software Developer

charlescahilig09@gmail.com | LinkedIn | GitHub

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, SQL

Frontend: React, Next.js, Tailwind CSS, shadcn/ui

Backend & APIs: Next.js API Routes, REST APIs, BFF Architecture, PHP

Data & Mobile: PostgreSQL, MySQL, Microsoft SQL Server, Firebase, React Native

Tools: Git, GitHub, Postman, Vercel

EXPERIENCE

Software Developer Intern

2026

Bouvet Queueing System - Software Development Internship Project

- Built and maintained administrative interfaces for user, department, purpose-assignment, and queue-display workflows using Next.js, React, TypeScript, Tailwind CSS, and shadcn/ui.
- Integrated the frontend through Next.js API routes using a Backend-for-Frontend pattern with an existing REST API backed by Microsoft SQL Server, including authentication, payload mapping, and error handling.
- Implemented paginated and debounced search, add/edit flows, status updates, and form validation with react-hook-form and zod while keeping UI state aligned with existing API contracts.

SELECTED PROJECTS

Markly - Universal Personal Library

Personal Project

Next.js · React · TypeScript · Supabase · PostgreSQL · Browser Extension · PWA

- Built a personal library for websites, anime, manga, novels, games, movies, and series with source-aware resume behavior, exact-match auto-linking, manual duplicate merge/undo, and AniList synchronization.
- Implemented Supabase authentication and cloud persistence with row-level security, plus a Manifest V3 browser extension and installable PWA share-target flow.

[Live](#) | [GitHub](#)

Mansar Trucking Management System

Capstone Project

React Native CLI · PHP · MySQL · Firebase Realtime Database · Leaflet

- Built a mobile and web system around trucking workflows for drivers, trips, maintenance, expenses, and GPS-based location tracking.
- Separated structured business records in MySQL from periodically updated driver-location state in Firebase Realtime Database, with Leaflet used for admin-side map visualization.

EDUCATION

Colegio de San Juan de Letran - Manila

2026

Bachelor of Science in Information Technology, Major in Software Development
